PROFESSIONAL SUMMARY

Engineer who builds offline-first mobile apps and automates delivery workflows. Owns build configuration, release tooling and the office's shared developer environment.

CORE SKILLS

React, React Native, TypeScript, Node.js, PostgreSQL, Tailwind CSS

WORK EXPERIENCE

Senior Software Engineer
Acme Ltd, Rotterdam, Netherlands | April 2021 – Present

- Rebuilt the release workflows so a mobile build ships in ten minutes instead of an hour.
- Moved the app configuration into typed modules, which removed a class of startup crashes.
- Led the offline-first sync layer used by field staff with no reliable connection.
- Mentored four engineers and ran the weekly architecture review.

Software Engineer
Globex Corporation, Rotterdam, Netherlands | March 2017 – March 2021

- Rebuilt the release workflows so a mobile build ships in ten minutes instead of an hour.
- Moved the app configuration into typed modules, which removed a class of startup crashes.
- Led the offline-first sync layer used by field staff with no reliable connection.
- Mentored four engineers and ran the weekly architecture review.
